Electrical, Electronic and Information Technology I

පැය දෙකයි இரண்டு மணித்தியாலம் Two hours

Instructions:

- * Answer all the questions.
- * Write your Index Number in the space provided in the answer sheet.
- * Use of calculators is not allowed.
- * Instructions are given on the back of the answer sheet. Follow them carefully.
- In each of the questions 1 to 50, pick one of the alternatives from (1), (2), (3), (4), (5) which is correct or most appropriate and mark your response on the answer sheet with a cross (x) in accordance with the instructions given in the back of the answer sheet.
- 1. Of which of the following is the 'light year' a unit?
 - (1) light intensity
- (2) mass
- (3) time
- (4) distance
- (5) frequency
- Answer questions 2 to 3 using the following graph. The graph shows the motion of a landing aircraft after it touches down the runway. After 3 seconds of sudden deceleration, it moves in a constant velocity of 10 m/s until 6th second.

- 2. What is the displacement of the aircraft during its first 3 seconds?
 - (1) 132.5 m
- (2) 140 m
- (3) 185 m
- (4) 212.5 m
- (5) 215 m
- 3. What is the average deceleration of the aircraft, if it comes to a stop in 8 seconds?
 - (1) $[(65-60)/1+(60-10)/2+(10-0)/5] \div 8 \text{ ms}^{-2}$
 - (2) [(65-60)/1+(60-10)/2+(10-0)/5] ms⁻²
 - (3) $(65-60) / 3 + (10-0) / 5 \text{ ms}^{-2}$
 - $(4) (65-0) / 4 \text{ ms}^{-2}$
 - $(5) (65-0) / 8 \text{ ms}^{-2}$

See page two

4. Select the resistor arrangement which has the lowest resistance between points A and B.

(2)

(4)

5. Consider following battery arrangements prepared by a student. What are the minimum voltage (V_{min}) and maximum voltage (V_{max}) obtained between A and B points? 1.5 V

- (1) $V_{min} = 0.5 \text{ V}, V_{max} = 4.5 \text{ V}$
- (3) $V_{min} = 1.5 \text{ V}, V_{max} = 3.0 \text{ V}$
- (2) $V_{min} = 1.5 \text{ V}, V_{max} = 4.5 \text{ V}$ (4) $V_{min} = 3.0 \text{ V}, V_{max} = 4.5 \text{ V}$
- (5) $V_{min} = 5.0 \text{ V}, V_{max} = 15.0 \text{ V}$
- 6. Three ideal voltmeters and one ideal ammeter are connected in a circuit as shown in the figure. What is the correct answer with correct reading of M_1 , M_2 , M_3 and M_4 in same order?

- (1) 5V, 2.5V, 2.5V, 1A
- (2) 10 V, 5 V, 5 V, 2 A
- (3) 10 V, 10 V, 5 V, 1 A

- (4) 10 V, 5 V, 5 V, 1 A
- (5) 5V, 5V, 5V, 2A
- 7. Select the answer with correct parameters of standard domestic electricity supply of Sri Lanka.
 - (1) 230 V AC, 60 Hz
- (2) 230 V DC, 50 Hz

(3) 230 V AC, 50 Hz

- (4) 260 V AC, 60 Hz
- (5) 260 V AC, 90 Hz

8.	Which of the following is not a solution (1) MS Office	software used in com (2) C++	-	JAVA
	(4) MS Word	(5) Hard disk	,	
9.	Figure A and B show two V-put V-belt and a round rope respective both do not touch the flat surfat and the shape of the rope remains the correct statement about its fur following. (1) V-belt and rope should have stating. (2) V-belt slips first.	vely. Belt and rope ace of the V-grove is unchanged. Select unctioning from the	Figure A	Figure B
	(3) Rope slips first.(4) Slip cannot be analytically ex(5) Slip depends on the diameter	-		
10.	· · · ·	(2) generation of h		
11.	Which of the following energy for (1) electricity (2) heat			efficiently way? wind
12.	Consider the following statements A - Solar energy is renewable B - Biomass is non-renewable. C - Coal is renewable. D - Hydro power is non-renew Which of the above statements ar (1) A, B and C only. (4) B, C and D only.	vable.	nly. (3)	A, C and D only.
13.	What measuring instrument can be and the internal diameter (d) of a (1) Micrometer screw gauge (2) Meter ruler (3) Vernier calliper (4) Measuring tape (5) Protractor		curately the depth (h)	
14.	Which option gives the plan view in figure?	of the machine com	ponent shown	
	(1) (2)	(3)	(4)	(5) See page four

- A bar is at a stable position as in the figure below. Use the figure to answer questions 15 and 16.
- 15. Select the correct answer.
 - (1) $\omega = T$, $Q + T \cos 30^{\circ} = W$
 - (2) $\omega = T \cos 30^{\circ}, Q + T = W$
 - (3) $\omega = T$, Q + T = W
 - (4) $\omega = T \sin 30^{\circ}$, $Q T \cos 30^{\circ} = W$
 - (5) $\omega = 2T$, $Q + T \cos 30^{\circ} = W$
- **16**. What is the value of *P*?
 - $(1) \omega$
 - (2) $\omega \sin 30^{\circ}$
 - (3) $\omega \cos 30^{\circ}$
 - (4) $W+\omega \sin 30^{\circ}$
 - (5) $W+\omega$

- 17. Consider the following statements.
 - A Frictional coefficient between two metal is higher than that of metal on ice.
 - B Frictional coefficient is expected to reduce when a surface begins to move over the other.
 - C Sand is sometimes used to increase traction between two surfaces.
 - D Surface roughness has negligible influence when determining the theoretical frictional force.

Which of the above statements are true about sliding between two surfaces?

- (1) A, B and C only.
- (2) A, B and D only.
- (3) A, C and D only.

- (4) B, C and D only.
 - (5) All A, B, C and D.
- 18. A 10 W LED Lamp is installed in a house. It is consuming 10% more power due to an internal fault in the lamp. It is switched ON for 5 hours daily. What is the monthly (30 days) energy consumption?
 - (1) 0.165 kWh (2) 0.55 kWh
- (3) 1.65 kWh
- (4) 5.5 kWh
- (5) 16.5 kWh
- 19. When extinguishing a fire caused due to a volatile flammable liquid, best material to be used is
 - (1) dry chemical spray.
- (2) carbon dioxide jet.
- (3) compressed air jet.

(4) water jet.

- (5) foam extinguisher.
- 20. A human being inhales about 78% Nitrogen, 21% Oxygen and 1% others. Exhales 4% Water vapour, 75% Nitrogen, 16% Oxygen, and 4% Carbon dioxide. Which of the following statements are true?
 - A The body uses oxygen to breakdown foods to create energy.
 - B Carbon dioxide is produced by human cells.
 - C Water vapour is produced from moisture in the respiratory system.
 - D Exhaled air is warmer than the inhaled air.
 - (1) A, B and C only.
- (2) A, B and D only.
- (3) A, C and D only.

- (4) B, C and D only.
- (5) All A, B, C and D.

21. A vehicle travels along a straight road from point A to B and its velocity is as shown in the figure below.

V (ms⁻¹)
60
15
45
60
1 (s)

Which diagram indicates the acceleration (a) of the vehicle?

(1)

(2)

(3) $a \, (\text{ms}^{-2})$

(4)

(5) $a \, (\text{ms}^{-2})$

- 22. The roof truss shown in the figure is used to support roof loadings, W_1 , W_2 , W_3 , W_4 and W_5 . In order to reduce central deflection due to roof loading, following suggestions have been proposed.
 - A Add more diagonal members

B - Remove few diagonal members

C - Increase section areas of lower and bottom chord members

D - Connections are welded again.

Which of the above suggestions are correct?

- (1) A and B only.
- (2) A and C only.

(3) A and D only.

- (4) B and C only.
- (5) B and D only.

- 23. A hollow cement block is subjected to 10 kN load as shown in the figure. Axial Compressive stress applied on the block is
 - (1) 33 kPa.
- (2) 50 kPa.
- (3) 0.33 MPa.

- (4) 0.5 MPa.
- (5) 5 MPa.

- 24. $600 \, \text{kg}$ weight is lifted through the portable jack as shown in the figure. The Force applied at the arm AB is
 - (1) 300 kg.
- (2) 450 kg.
- (3) 600 kg.

- (4) 1000 kg.
- (5) 8000 kg.

- 25. Which of the following skills can be observed in an efficient street-side cobbler, who mends footwear?
 - A Passion to serve customers
 - B Strong personal skills.
 - C Creativity.
 - D Competitiveness.
 - (1) A, B and C only.
- (2) A, B and D only.
- (3) A, C and D only.

- (4) B, C and D only.
- (5) All A, B, C and D.

end ring

- (1) Direct current shunt motor
- (2) Direct current series motor
- (3) Squirrel cage type induction motor
- (4) Direct current compound motor
- (5) Universal motor
- 27. Consider the following statements.
 - A Direct current series motors are used in traction applications of electric trains.
 - B Speed of shunt wound direct current motor can be controlled at a constant value.
 - C Compound direct current motors have characteristics of both series direct current motors and shunt direct current motors upto some extent.

Select the correct answer with statement/statements regarding direct current motors.

(1) A only

(2) B only

(3) C only

- (4) A and B only
- (5) All A, B, and C
- 28. What element can be used to obtain a p-type semiconductor through doping silicon?
 - (1) P
- (2) B
- (3) Sb
- (4) Bi
- (5) K

- 29. What is the current going through R_L of the following circuit?
 - (1) 2 μ A
- (2) 0.5 mA
- (3) 1.5 mA

- (4) 2 mA
- (5) 2 A

- 30. Consider the following statements.
 - A Current gain is greater than one in the common-base configuration.
 - B Voltage gain is greater than one in the common-emitter configuration.
 - C There exists a 180° phase difference between the input and output in the common-emitter configuration.

Select the correct statement/statements from the above statements.

(1) B only

(2) A and B only

(3) A and C only

- (4) B and C only
- (5) All A, B, and C
- 31. Which option shows the symbols of an SCR and a DIAC, respectively?

- (3) and (4) and and
- and —
- 32. Consider the following statements.
 - A- Open-loop voltage gain is infinite.
 - B- The input resistance is zero.
 - C- The output resistance is infinite.
 - D- The operational bandwidth is infinite.

Which of the above statements are true regarding an ideal operational amplifier?

- (1) A and D only
- (2) B and C only

(3) C and D only

- (4) A, B and C only
- (5) All A, B, C and D
- 33. What is the voltage gain of the following amplifier?

- (1)-11
- (2)-10
- (3) -0.1
- (4) 0.1
- (5) 20
- 34. What is the frequency range used for frequency modulation (FM) radio transmission in Sri Lanka?
 - (1) 88 108 kHz
- (2) 80 100 MHz

(3) 88 – 108 MHz

- (4) 98 108 MHz
- (5) 1 3 GHz

35. The input signal x(t) and the carrier signal c(t) for amplitude modulation (AM) are shown below.

Carrier signal

What is the amplitude modulated waveform y(t)?

36. What is the output of the following logic circuit?

$$(1) \ A+B+\overline{C}$$

(2)
$$\overline{A} + \overline{B} + \overline{C}$$

(3)
$$\overline{A+B}+\overline{C}$$

(4)
$$\overline{A+B}+C$$

(5)
$$\overline{A + B} + C$$

37. What is the equivalent logic gate for the following logic circuit?

- (1) NAND
- (2) NOR
- (3) AND
- (4) XNOR
- (5) XOR

38. Three capacitors 1, 2 and 3 are connected in parallel. What is the total capacitance of the network?

	Cross section	Distance between plates	Permittivity of medium
Capacitor 1	A	3 <i>d</i>	ε
Capacitor 2	2A	2 <i>d</i>	ε
Capacitor 3	3A	d	ε

- (1) $\frac{A\varepsilon}{d}$
- $(2) \quad \frac{2At}{d}$
- $(3) \quad \frac{13A\varepsilon}{3d}$
- (4) $\frac{A\varepsilon}{2d}$
- (5) $\frac{A\varepsilon}{3d}$

39. Three conductors A, B and C are connected as shown in the figure. What is the total resistance? (Assume that the resistance of connecting conductor is zero.)

	Cross section	Length	Resistivity
Conductor A	2 <i>a</i>	21	ρ
Conductor B	2 <i>a</i>	21	ρ
Conductor C	2 <i>a</i>	l	ρ

- (1) $\frac{\rho l}{a}$ (2) $\frac{2\rho l}{a}$ (3) $\frac{5\rho l}{2a}$ (4) $\frac{4\rho l}{a}$ (5) $\frac{6\rho l}{a}$

40. Select the incorrect statement regarding the DC circuit given in the figure.

- (1) Current supplied by the DC source (I) is lowest when all switches $(S_1, S_2 \text{ and } S_3)$ are closed.
- (2) Total resistance between X and Y points is 40Ω when all switches are open.
- (3) Total resistance between X and Y points is 10Ω when all switches are closed.
- (4) I = 0.5 A when S_1 is closed and S_2 , S_3 are open.
- (5) All resistors will consume same power when all switches are closed.
- 41. Consider statements related to following two circuits. R pure resistor and B incandescent lamp are identical in both circuits.

- A- Bulb B will have same brightness in both circuits.
- B- Supply AC voltage and circuit current are in phase in the circuit 2.
- C- Supply AC voltage and circuit current has phase shift of 90° in the circuit 2.

Among the above select the answer that gives correct statement/statements.

(1) A only

(2) B only

(3) C only

- (4) A and B only
- (5) All A, B and C

42. A pure inductor is connected to an Alternating current source as given in the following figure. Select the answer that represents the waveforms of V and I.

43. A 75 W incandescent bulb is going to be replaced by 5 W LED bulb. This bulb is switched ON for 5 hours a day and cost of 1 kWh is Rs. 10.00. What is the daily saving?

(1) Rs. 3.50

- (2) Rs. 7.00
- (3) Rs. 35.00
- (4) Rs. 70.00
- (5) Rs. 350.00

- 44. Consider the following statements.
 - A- Documents, pictures and video can be stored in online storage facilities.

B- Username and password is a must for browsing any webpage.

C- Video conferencing can be used to conduct a meeting when participants are from different countries.

Select the answer with correct statement/statements.

(1) A only

(2) B only

(3) A and B only

- (4) A and C only
- (5) All A, B and C
- 45. Select the type of circuit breaker not used in higher voltages. (higher than 12 kV)
 - (1) SF6 circuit breaker.
- (2) Vacuum circuit breaker.
- (3) Oil circuit breaker.

- (4) Air circuit breaker.
- (5) Residual current circuit breaker.

- 46. Consider the following statements regarding three phase Alternating current supply.
 - A There is a phase shift of 120° between phases.
 - B In a star connected source, phase voltage $V_{\rm P}=\sqrt{3}~V_{\rm L},~V_{\rm L}$ is line voltage.
 - C Phase waveform is as in the figure. V_{\blacktriangle}

Select the answer with correct statement/statements.

(1) A only

(2) B only

(3) C only

- (4) A and B only
- (5) All A, B and C
- 47. Consider the line diagram of a domestic circuit given in the figure and select the answer with the correct type of the circuit.

- (2) Circuit with two way switch arrangement and a lamp.
- (3) Circuit with two socket outlets and a lamp.
- (4) Circuit with two socket outlets.
- (5) Circuit with a socket outlet and a lamp.

• Answer questions 48, 49 and 50 based on the following production process.

Consider the following conveyor used in the production process is operated by motor M. Three types of metal boxes are produced. Type 1 and Type 2 boxes will be stored in C_1 by actuating A actuator. Type 3 will be stored in C_2 .

48. Assume that the sensor's output will be logic '1' $(S_1, S_2 \text{ and } S_3)$, when the sensor is covered by a metal box. Furthermore, the sensor output will be '0', when there is no metal box in front. Select the correct sequence of outputs for following sequence of box production.

49. Select the answer with correct logic circuits for activating A.

$$(4) \quad S_1 \longrightarrow A$$

50. Consider the following outputs of S_1 , S_2 and S_3 sensors were observed during another production sequence. Select the answer with correct number of boxes available in each output container $(C_1 \text{ and } C_2)$ after the production sequence is over.

(1)
$$C_1 = 4$$
, $C_2 = 5$

(2)
$$C_1 = 5$$
, $C_2 = 4$

(3)
$$C_1 = 4$$
, $C_2 = 4$

(4)
$$C_1 = 0$$
, $C_2 = 9$

(5)
$$C_1 = 9$$
, $C_2 = 0$

Use additional reading time to go through the question paper, select the questions and decide on the questions that you give priority in answering.

Index No.	:	***************************************	

Important:

- * This question paper consists of 11 pages.
- * This question paper comprises Parts A, B and C. The time allotted for all parts is three hours. (Use of calculators is not allowed.)

Part A - Structured Essay (08 pages)

- * Answer all the questions on this paper itself.
- * Write your answers in the space provided for each question. Note that the space provided is sufficient for your answers and that extensive answers are not expected.

Part B and C - Essay (03 pages)

- * Select minimum of two questions from each of the parts B and C and answer four questions only. Use the papers supplied for this purpose. At the end of the time allotted for this paper, tie the three parts together so that Part A is on the top of Part B and C before handing over to the supervisor.
- * You are permitted to remove only Parts B and C of the question paper from the Examination Hall.

For Examiner's Use Only

PART A - Structured Essay

Answer all four questions on this paper itself. (Each question carries 10 marks)

Do not write in this column

1. An isometric view of a machine component is shown in the figure. Machine component is symmetric along the vertical plane passing through X-X. Assuming any missing dimensions, draw the following views to a suitable scale using first angle projection principle. Show all relevant dimensions in the sketches. Use the graph sheets given on page 3 and 4 to answer the questions. (All dimensions are in mm.)

- (i) Front elevation seen through direction A.
- (ii) End elevation seen through direction B.
- (iii) Plan.

2.	follo The usin It w at t as p Furt univ with Ass	group of teachers from City School are planning to have an interactive classroom with owing special functions. By have installed an interactive multimedia projector. Teacher can write on the board by a digital pen and content can be stored in the memory. Digital pen is not an ink pen. Will show in display in digital form. Content can be transferred to the computer connected the teacher's desktop. Further, this can be used to comment on top of other content such power point presentations, word documents, web pages etc. Thermore, they have planned to use this interactive classroom for getting the service of versity lecturers using video conferencing facilities. Students are given facilities to interact in the lecturer. There is software required for the laptop at the teacher's desk in addition to specific software and drivers of interactive display.	Do not write in this column
		(3)	
	(b)	State three types of additional hardware required for the interactive classroom in addition to computers or laptops.	
		(1)	
		(2)	
		(3)	
	(c)	Assume all student are using their laptops. State two options for networking student laptops and connecting them with the teacher's laptop.	
		(1)	
		(2)	
	(d)	Students are requested to submit their classroom assignments online. State one facility suitable for this purpose.	
	(e)	In group activities, students are requested to collaboratively develop group reports. State one facility suitable for this purpose.

* Select two questions from each of the Parts B and C and answer four questions only. (Each question carries 15 marks.)

Part B

- 1. Safety at public places like bus/railway stations, schools and market places is paramount for the people to roam free and also to carry out their economic activities. The feeling of lack of safety could adversely affect the economy of a country.
 - (a) List three types of safety issues that could take place in a public place.
 - (b) Briefly explain two modern technological solutions that can be used to improve safety by addressing issues you mentioned in part (a) above.
 - (c) Briefly explain two non-technical solutions that can be used to improve safety by addressing issues you mentioned in part (a) above.
 - (d) Discuss with two points, how the lack of safety at public places can adversely affect the economy of Sri Lanka.
- 2. Integration of electronic vehicles into 'Smart homes' is a green concept introduced for energy management for domestic customers. Assuming you are the owner of this proposed 'Smart homes', answer the following questions based on the power circuit given in the following figure and details given below. 240 V

PHEV Battery Specification: 10 kWh battery takes 5 hours to charge fully. Vehicle is used only 20 days per month and every day it is charged fully using the main supply. Once charged fully, 20 km can be run without using Petrol.

Roof top PV

: 2 kW panels:

Assume that PV produces energy of an average of 5 hours per day in full capacity with 100% efficiency. Energy is sold to the CEB for a cost of Rs. 20.00 per unit.

1 unit = 1 kWh

Before buying PHEV, the average energy consumption was 200 units per month. Domestic customer Tariff for electricity is as follows.

Monthly Consumption (kWh)	Unit charge (Rs.)
0 - 60	8
61 - 90	10
91 - 120	28
121 - 180	32
>180	45

Fixed charge for a customer above 180 units usage per month is Rs. 540.00.

- (a) What is total energy generated by the 2kW PV roof top per month?
- (b) What is the total energy consumed by the 'PHEV' for charging per month?
- (c) What is the total income from selling energy to Ceylon Electricity Board?
- (d) What is the Net-Electricity Bill per month?
- (e) Assuming the Petrol cost is Rs. 150.00 and from one litre the vehicle can run 10 km, what is your opinion regarding the usage of charging PHEV using main supply?
- 3. World elderly population increase rapidly. However, there is a problem of availability of skilled care givers and new generation is busy with their daily activities. Technological solutions are being developed to address this problem. The elderly people prefer to be in their homes rather than living in special elderly care homes.
 - (a) Discuss **three** technological innovations that can be used to improve physical and mental well-being of the elderly.
 - (b) Select **one** technological innovation mentioned in (a) above and explain how it can be used to keep elderly in their own homes rather than in a home for elders, taking into consideration the busy life style of the present generation.
 - (c) Discuss **two** instances where technology can assist elderly people to attend to their daily activities independently.

Part C

4. (a) A combinational logic circuit with three inputs and one output is shown below.

- (i) Determine the Boolean expression for the output F of the circuit.
- (ii) Using relevant axioms and theorems, simplify the above Boolean expression in order to obtain the most simplified Boolean expression.
- (iii) Prepare the truth table corresponding to the most simplified Boolean expression obtained in part (ii) above.
- (iv) Explain whether the above circuit can be used to identify the prime numbers between 0 and 7.
- (v) Draw the logic circuit corresponding to the most simplified Boolean expression obtained in part (ii) above.

- (b) (i) Draw the circuit of an SR flip-flop using NOR gates.
 - (ii) The input signals of a positive-edge triggered JK flip-flop are shown below. If the initial state of the output Q is 0, draw the output of the JK flip-flop with the clock signal.

5. Assume that you have been requested to develop a new web interface for a student project. Structure of the interface is given below. Here 'ON', 'OFF' and 'Pause' link to hardware components. (Assume that they have implemented similar to a web link to other pages.)

- (a) Write a program with HTML tags to develop the above web interface.
- (b) The students are planning to develop a help page as a new page. They wanted to include a video of an experiment, detailed steps as a series of images and descriptions. The experiment setup is as shown below.

- (i) Give the details of your help page.
- (ii) Write an HTML program for preparing the webpage for help.
- **6.** (a) Hydro power plants are used to generate considerable amount of energy requirement in Sri Lankan power system.
 - (i) A hydropower plant can be categorised based on water head as low, medium and high head plants. Name suitable turbine types for each type.
 - (ii) Name the four main components of a large hydropower station with a reservoir.
 - (b) High voltages are used in transmitting power in long distances. Transformers are used to step up and step down voltages for this purpose.
 - (i) Give a reason for using high voltages for transmitting power.
 - (ii) Three windings of the three phases in a three-phase transformer (in primary or secondary) are connected in two ways. What are those **two** ways? Explain the **two** methods with illustrations.
 - (iii) List **three** three-phase transformer types based on winding connections of the primary and secondary as identified in part (ii) above.
